

North Thurston School District Service Center Lacey, WA

Overview

Parking lot expansion at existing bus facility and service center, including layout and design of stormwater facilities to serve entire site.

Key Elements

- Building expansion required upgrading the entire site to meet current stormwater requirements.
- Existing site had flooding problems. Discharge for the stormwater had to be negotiated with the City of Lacey and required a special dispersion trench design.

Services

- Topographic surveying
- Civil engineering
- Landscape and irrigation design
- Construction support
